

When opening the web page, it will show a simple welcome page (For now it's simple, will improve the page later)

[Project Name](#) [Register](#) [Login](#) [Logout](#)

## Express

Welcome to Express

There are three navigation bar register, login, and logout. When selecting register, it will show a page with user's require input field name, email, username, password and confirm password.

[Project Name](#) [Register](#) [Login](#) [Logout](#)

## Register

Please enter the requirements then press "Register"

**Name**

**E-mail**

**Username**

**Password**

**Confirm Password**

If the format is incorrect, it will show error message. The Image below is an example of confirm password is not match with the password:

[Project Name](#) [Register](#) [Login](#) [Logout](#)

## Register

Please enter the requirements then press "Register"

- Password does not match

**Name**

**E-mail**

**Username**

**Password**

**Confirm Password**

[Register](#)

By selecting login from the navigation bar, it will bring up a page for user to input username and password:

[Project Name](#) [Register](#) [Login](#) [Logout](#)

## Login

Please enter the requirements then press "Login"

**Username**

**Password**

[Login](#)
